PROFESSIONAL SUMMARY

Laravel-focused Full-Stack Developer with 3+ years of experience delivering production modules for ERP, CRM, healthcare, civic-service, billing, and logistics platforms. Builds modular backend services, REST APIs, role-based workflows, reporting systems, payment flows, and third-party integrations. Experienced in requirement analysis, database workflows, implementation, debugging, deployment support, and production issue resolution, with practical use of OpenAI API integration and workflow automation.

CORE TECHNICAL SKILLS

Backend & Architecture: Laravel, PHP, MySQL, SQL, REST API design, Redis, caching, queues, background jobs, authentication, RBAC

Integrations & AI: OpenAI API, prompt engineering, structured outputs, contextual agents, payment gateways, webhooks, third-party APIs

Production & Security: Linux, VPS, Nginx, SSL, request validation, secure callback flows, logging, monitoring, Git and GitHub

Business Systems: ERP, CRM, HRM, healthcare, billing, invoicing, reporting, civic services, courier management

PROFESSIONAL EXPERIENCE

Riyadh Online | Full-Stack Developer | Jan 2024 - Present

- Own end-to-end delivery and maintenance of Laravel modules across CRM, ERP, union-service, courier-management, and template-based platforms.
- Translate operational requirements into reusable services, REST APIs, role-based workflows, database processes, and reporting components that remain maintainable across product lines.
- Perform root-cause analysis on production issues and implement controlled fixes that preserve data integrity and continuity of existing business workflows.
- Integrate third-party services and coordinate technical changes with product and operations stakeholders, reducing integration risk during feature delivery.

TDevs | Full-Stack Developer | Jan 2023 - Oct 2023

- Delivered client-specific HRM and CodeCanyon features after reviewing existing application architecture, dependencies, and customization constraints.
- Designed and implemented payment gateway flows covering callbacks, webhooks, transaction-state handling, validation, and application-level error management.
- Refactored Laravel modules and database logic to resolve functional and data defects, making future customization safer and easier to maintain.

Desktop IT | Junior Developer | Jun 2022 - Dec 2022

- Collaborated with senior developers to implement and integrate application modules while following established architecture and coding standards.
- Investigated application and database defects and supported testing, regression validation, and release preparation for stable feature integration.
- Participated in daily technical coordination and applied code-review feedback, improving consistency with team development practices.

SELECTED PROJECTS

Aiyat Clinic Management Software | aiyat.com

- Role & challenge: Translated clinical and administrative requirements into connected Laravel modules while preserving continuity across patient, laboratory, HR, payroll, billing, invoice, and medical-report data.
- Solution & scope: Structured role-based services linking IPD, OPD, sample collection, testing, billing, permissions, workforce operations, and configurable report generation.
- Outcome & technology: Centralized the flow from patient registration through testing, billing, and reporting using Laravel, PHP, MySQL, JavaScript, REST APIs, and PDF/report generation.

Amlaek Real Estate Platform and Noorixa ERP | amlaek.com | erp.amlaek.com

- Role & challenge: Contributed across the public real estate platform and ERP while connecting listing and service workflows with projects, tasks, teams, time tracking, CRM, reports, and analytics.
- Solution & scope: Organized role-based modules around shared business data covering commercial property discovery, service requests, project delivery, team coordination, and customer records.
- Outcome & technology: Centralized operational visibility and reporting using Laravel, PHP, MySQL, JavaScript, REST APIs, RBAC, and analytics components.

UnionDesk and Khadim Nagar Union Parishad Portal | khadimnagarup.com | uniondex.xyz

- Role & challenge: Connected citizen-facing services with controlled administration to replace fragmented handling of applications, certificates, verification, holding tax, and service records.
- Solution & scope: Built submission, review, approval, status-tracking, certificate-verification, searchable-record, public-information, and report-generation workflows.
- Outcome & technology: Created a searchable and verifiable service process using Laravel, PHP, MySQL, JavaScript, role-based administration, document generation, and reporting.

ENGINEERING PRACTICES AND AI

Production & Security: Production diagnosis, RBAC, request validation, secure callbacks/webhooks, queues, Linux/VPS/Nginx/SSL, logging and monitoring

Technical Collaboration: Architecture review, stakeholder coordination, integration planning, regression validation, release preparation and code-review practices

AI Delivery: OpenAI API integration, task-specific prompts, structured output validation, contextual chat/agent workflows, usage/error logging, extraction and summarization

EDUCATION AND LANGUAGES

Diploma in Computer Engineering: Thakurgaon Polytechnic Institute | 2021 | CGPA 3.61/4.00

Secondary School Certificate (Science): Nouton Bandar Bangheri High School | 2017 | GPA 4.23/5.00

Languages: Bangla - Native | English - Professional working proficiency
